Name Your Forms

Track which campaigns generate leads

Clio Catch automatically uses your **form name** as the lead source in Clio Grow. This lets you track exactly which marketing campaigns are generating leads.

Simply name your forms after your campaigns:

EXAMPLES

 "Google Ads - Wrongful Termination"	→	✓ Appears in Clio as this source
 "Facebook - Free Consultation"	→	✓ Appears in Clio as this source
 "Website - Contact Page"	→	✓ Appears in Clio as this source
 "Referral - Partner Landing Page"	→	✓ Appears in Clio as this source

Pro Tip: Be Specific

The more specific your form names, the better you can track your marketing ROI. Instead of just "Google Ads", try "Google Ads - Employment Law - January 2026".
